DETAILED ACTION***Allowable Subject Matter***

Claims 1-46 are allowed in view of the Applicant's arguments (Response filed 8/15/2006) and the cited prior art of record. The independent claims recite loading modules for devices in a SAN network in which when a data processing system executes a program and loads a first set of device modules and during execution of the program, the program receives a signal indicating that the device information has been modified and in response thereto, deleting the first set of modules, accessing the modified device information, and loading a new set of code modules referenced by the modified device information before modification from the address space of the executing program which, in addition to the rest of the claim limitations, are distinguished from the prior art. For support, see Instant Specification (p2, lines 5-15, p5, lines 9-23, p6, line 32 through page 7, line 20, p9, line 22 through p10, line 25, p11, lines 8-23, line 31 through p9 line 21).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
